

QUICK GUIDES FOR **Learning with Apple**

Learn how to support engaging learning environments with Apple. Each quick guide delivers five tips to help you make the most of the built-in features of iPad and Mac for learning from home.

5
tips to

- ✓ STAY FOCUSED
- ✓ ORGANIZE IPAD FOR LEARNING
- ✓ MANAGE SCREEN TIME
- ✓ INCREASE PRODUCTIVITY
- ✓ TELL STORIES

5 Tips to Stay Focused

Staying on task supports critical thinking and expands creativity.

1 Encourage concentration.

Create a learning environment without calls, alerts, or notifications. In Do Not Disturb settings on your iPad, make sure you select Always below Silence.

2 Simplify multitasking.

Drag text, photos, and files between two windows or apps using Split View. The side-by-side view offers seamless access, reducing back-and-forth navigation. Turn on Multitasking under Home Screen & Dock in Settings.

3 Adjust notifications.

Tapping app icons with badges—the red circles indicating new items—can divert your student's attention from learning. For nonessential apps, turn Badges off in Settings > Notifications.

4 Reduce in-app distractions. ★★★★★

Requests for In-App Ratings & Reviews can lead your student away from learning. You can turn this feature off in Settings under iTunes & App Store.

5 Stay on track.

Structure learning segments using the timer in the Clock app. The orange line decreases as the timer counts down, so your student can visualize the concept of time. They can select a sound to alert them when time is up.

5 Tips to Organize iPad for Learning

Organizing iPad for learning makes it easier for your student to get going each day and stay productive and engaged.

1  **Update the OS.** 

Make sure your student's device is up to date on features, products, and security. In Settings, tap General to find out if you have the latest software update.

2  **Create website shortcuts.** 

Tap Add to Home Screen from the Safari share options to create an icon for websites your student uses most often.

3  **Curate an app collection.** 

Organize your student's most-used apps or sites into a collection on the Home screen. Touch and hold any app, then drag it onto another app, and label the new folder.

4  **Share notes.**

Organize learning resources easily in Notes. Create folders for subjects, make handy checklists, and share with the whole family. Pin important notes to keep them at the top.

5  **Manage schedules.** 

Create a shared calendar on all your family's devices in the Calendar app. Keep everyone on track with reminders and use alerts as a virtual school bell.

5 Tips for Managing Screen Time

Screen Time includes features that are great for helping you choose how—and how often—your student uses their device.

1

Keep track.

With Screen Time, you can see total device time by day and week, as well as which apps your student used most.

2

Take a break.

Use Downtime to set aside time each day for breaks from the screen. When enabled, only apps you allow and phone calls are available.

3

Structure time.

Use App Limits for things like allowing more time for educational and creativity apps and minimizing distractions from social networking apps.

4

Create a circle of trust.

Communication Limits helps you manage who your student can communicate with freely from their device.

5

Choose appropriate content.

Use Content & Privacy Restrictions to block inappropriate websites, purchases, and downloads on your student's device.

5 Ways to Increase Productivity

All students can benefit from built-in accessibility features that enhance the learning experience and increase productivity.

1

Tap into action.

Simplify access to menus, controls, and functions using AssistiveTouch. The single tap function helps with limited motor skills, and the customized menu includes features you use most—like Multitasking and Screenshot. Your student can also drag the menu button under text to use it as a guide while reading.

2

Boost reading fluency.

Follow along as highlighted words are spoken aloud with Speak Selection and Highlight Content. This can strengthen reading comprehension and help your student edit work.

3

Stay focused on web content.

Safari Reader removes ads, reduces distractions, and lets you adjust text size, contrast, and font style. With a two-finger swipe down, Speak Screen will read the page's content aloud.

4

Minimize distractions from learning.

Guided Access locks iPad into one app and lets you control features and time limits. With a finger, circle areas onscreen you don't want responding to touch, like a web link in Safari.

5

Express thoughts and improve writing.

Apps like Pages, Keynote, and Notes have Dictation, which can help convey a message and develop writing skills without letting the mechanics get in the way. Tap the mic key on the iPad keyboard, or choose Edit > Start Dictation in a macOS app.

5 Ways to Tell Stories

Storytelling is a great way to communicate feelings and connect with friends and family.

1

Say it out loud.

Record yourself reading a book or telling someone about your day using Voice Memos, then share the recording in Messages or Mail.

2

Share photo albums.

Invite others to follow along on your adventures or daily life with Shared Albums. Friends can give your images a thumbs-up and leave comments as the stories unfold.

3

Build a story together.

Outline a story on slides in Keynote, then send a link to the document so friends can add photos, shapes, and more. Export as a movie and share your collaboration.

4

Create picture books.

Write or draw a story in a Pages book template. Then bring the story to life with narration using the Record Audio feature. Export the book as an EPUB document to share with friends.

5

Make a movie.

Narrate a fun adventure with photos and videos using the Clips app. Posters, animated stickers, filters, and Live Titles give you lots of ways to express your feelings and ideas.
