Jeannine.Aversa@bea.gov

Personal Income and Outlays: April 2020

Personal income increased \$1.97 trillion (10.5 percent) in April according to estimates released today by the Bureau of Economic Analysis (tables 3 and 5). **Disposable personal income** (DPI) increased \$2.13 trillion (12.9 percent) and **personal consumption expenditures** (PCE) decreased \$1.89 trillion (13.6 percent).

Real DPI increased 13.4 percent in April and **Real PCE** decreased 13.2 percent (tables 5 and 7). The **PCE price index** decreased 0.5 percent (table 9). Excluding food and energy, the PCE price index decreased 0.4 percent.

Coronavirus (COVID-19) Impact on April 2020 Personal Income and Outlays

The April estimate for personal income and outlays was impacted by the response to the spread of COVID-19, as federal economic recovery payments were distributed, and governments continued with “stay-at-home” orders. The full economic effects of the COVID-19 pandemic cannot be quantified in the personal income and outlays estimate for April because the impacts are generally embedded in source data and cannot be separately identified. For more information, see the “[highlights](#)” file and the [Effects of Selected Federal Pandemic Response Programs on Personal Income](#) table.

	2019		2020		
	Dec.	Jan.	Feb.	Mar.	Apr.
	Percent change from preceding month				
Personal income:					
Current dollars	0.2	0.6	0.5	-2.2	10.5
Disposable personal income:					
Current dollars	0.2	0.6	0.5	-2.1	12.9
Chained (2012) dollars	-0.1	0.5	0.4	-1.8	13.4
Personal consumption expenditures (PCE):					
Current dollars	0.4	0.4	0.2	-6.9	-13.6
Chained (2012) dollars	0.1	0.3	0.1	-6.7	-13.2
Price indexes:					
PCE	0.3	0.1	0.1	-0.2	-0.5
PCE, excluding food and energy	0.2	0.2	0.1	0.0	-0.4
	Percent change from month one year ago				
Price indexes:					
PCE	1.6	1.8	1.8	1.3	0.5
PCE, excluding food and energy	1.6	1.7	1.8	1.7	1.0

The increase in personal income in April primarily reflected an increase in government social benefits to persons as payments were made to individuals from federal economic recovery programs in response to the COVID-19 pandemic (table 3). For more information, see [“How are the economic impact payments for individuals authorized by the CARES Act of 2020 recorded in the NIPAs?”](#).

The \$1,662.1 billion decrease in real PCE in April reflected a \$758.3 billion decrease in spending for goods and a \$943.3 billion decrease in spending for services (table 7). Within goods, decreases in all subcomponents were led by a decrease in food and beverages. Within services, the largest contributors to the decrease were spending for health care as well as food services and accommodations. Detailed information on monthly real PCE spending can be found on [Table 2.3.6U](#).

Personal outlays decreased \$1.91 trillion in April (table 3). **Personal saving** was \$6.15 trillion in April and the **personal saving rate**—personal saving as a percentage of disposable personal income—was 33.0 percent (table 1).

Upcoming Annual Update of the National Income and Product Accounts

BEA will release results from the 2020 annual update of the National Income and Product Accounts on July 30, 2020, in conjunction with the advance estimate of GDP for the second quarter of 2020. For estimates of real GDP and its major components, the span of the update will cover the most recent five years (2015-2019) and the first quarter of 2020. Estimates of income and saving will be subject to revision from 1999 through the first quarter of 2020. More information on the 2020 annual update is included in the May *Survey of Current Business* article, [“GDP and the Economy.”](#)

Updates to Personal Income and Outlays

Quarterly Census of Employment and Wages Included in the Fourth Quarter of 2019

This release includes revised estimates of wages and salaries, personal taxes, and contributions for government social insurance for October through December 2019 (fourth quarter). These estimates reflect the incorporation of new fourth-quarter data from the Bureau of Labor Statistics' Quarterly Census of Employment and Wages.

Estimates have been updated for October 2019 through March 2020. Revised and previously published changes from the preceding month for current-dollar personal income, and for current-dollar and chained (2012) dollar DPI and PCE, are shown below.

	Change from preceding month							
	February				March			
	<u>Previous</u> (Billions of dollars)	<u>Revised</u>	<u>Previous</u> (Percent)	<u>Revised</u>	<u>Previous</u> (Billions of dollars)	<u>Revised</u>	<u>Previous</u> (Percent)	<u>Revised</u>
Personal income:								
Current dollars	104.6	104.0	0.6	0.5	-382.1	-413.8	-2.0	-2.2
Disposable personal income:								
Current dollars	87.9	88.2	0.5	0.5	-334.6	-349.0	-2.0	-2.1
Chained (2012) dollars	66.5	68.2	0.4	0.4	-261.8	-280.9	-1.7	-1.8
Personal consumption expenditures:								
Current dollars	26.8	31.5	0.2	0.2	-1,127.3	-1,031.7	-7.5	-6.9
Chained (2012) dollars	12.8	18.2	0.1	0.1	-983.9	-902.7	-7.3	-6.7

Next release: June 26, 2020 at 8:30 A.M. EDT
 Personal Income and Outlays: May 2020

Definitions

Personal income is the income received by, or on behalf of, all persons from all sources: from participation as laborers in production, from owning a home or business, from the ownership of financial assets, and from government and business in the form of transfers. It includes income from domestic sources as well as the rest of world. It does not include realized or unrealized capital gains or losses.

Disposable personal income is the income available to persons for spending or saving. It is equal to personal income less personal current taxes.

Personal consumption expenditures (PCE) is the value of the goods and services purchased by, or on the behalf of, "persons" who reside in the United States.

Personal outlays is the sum of PCE, personal interest payments, and personal current transfer payments.

Personal saving is personal income less personal outlays and personal current taxes.

The **personal saving rate** is personal saving as a percentage of disposable personal income.

Current-dollar estimates are valued in the prices of the period when the transactions occurred—that is, at "market value." Also referred to as "nominal estimates" or as "current-price estimates."

Real values are inflation-adjusted estimates—that is, estimates that exclude the effects of price changes.

For more definitions, see the [Glossary: National Income and Product Accounts](#).

Statistical conventions

Annual rates. Monthly and quarterly values are expressed at seasonally-adjusted annual rates (SAAR). Dollar changes are calculated as the difference between these SAAR values. For detail, see the FAQ "[Why does BEA publish estimates at annual rates?](#)"

Month-to-month percent changes are calculated from unrounded data and are not annualized.

Quarter-to-quarter percent changes are calculated from unrounded data and are displayed at annual rates. For detail, see the FAQ "[How is average annual growth calculated?](#)"

Quantities and prices. Quantities, or "real" volume measures, and prices are expressed as index numbers with a specified reference year equal to 100 (currently 2012). Quantity and price indexes are calculated using a Fisher-chained weighted formula that incorporates weights from two adjacent periods (months for monthly data, quarters for quarterly data and annuals for annual data). For details on the calculation of quantity and price indexes, see Chapter 4: Estimating Methods in the [NIPA Handbook](#).

Chained-dollar values are calculated by multiplying the quantity index by the current dollar value in the reference year (2012) and then dividing by 100. Percent changes calculated from real quantity indexes and chained-dollar levels are conceptually the same; any differences are due to rounding. Chained-dollar values are not additive because the relative weights for a given period differ from those of the reference year. In tables that display chained-dollar values, a "residual" line shows the difference between the sum of detailed chained-dollar series and its corresponding aggregate.

p Preliminary

r Revised. Revisions include changes to series affected by the incorporation of revised wage and salary estimates for the fourth quarter of 2019.

1. Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

2. Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.

3. Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.

4. Consists of nonmortgage interest paid by households. Note that mortgage interest paid by households is an expense item in the calculation of rental income of persons.

5. The current-dollar measure is deflated by the implicit price deflator for personal consumption expenditures.

6. Population is the total population of the United States, including the Armed Forces overseas and the institutionalized population. The monthly estimate is the average of estimates for the first of the month and the first of the following month; the annual and quarterly estimates are averages of the monthly estimates.

^r Revised. Revisions include changes to series affected by the incorporation of revised wage and salary estimates for the fourth quarter of 2019.

1. Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

2. Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.

3. Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.

4. Consists of nonmortgage interest paid by households. Note that mortgage interest paid by households is an expense item in the calculation of rental income of persons.

5. The current-dollar measure is deflated by the implicit price deflator for personal consumption expenditures.

6. Population is the total population of the United States, including the Armed Forces overseas and the institutionalized population. The monthly estimate is the average of estimates for the first of the month and the first of the following month; the annual and quarterly estimates are averages of the monthly estimates.

1. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.

2. Consists of gasoline and other energy goods and of electricity and gas services.

3. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.
