

Council Report

Original signed by: City Manager Johnson

Report Date: April 25, 2018

Meeting Date: May 1, 2018

To: City Manager

From: Director of Capital Works & Infrastructure

Subject: Road Rehabilitation / Overlay Paving

Purpose

To seek Council's approval on paving projects that will be completed under the Road Overlay Paving Program in 2018.

Summary

City Council has approved the 2018 Capital Works which includes Road Rehabilitation/Overlay Paving with a budget of \$375,000 (location to be determined)

Recommendation

THAT Quesnel City Council direct staff to proceed with the recommended projects on Doherty Drive, Willis Street, Pierce Crescent, Shepherd Ave., Lazzarin Street, and Sargent Street at an estimated cost of \$376,900

Strategic Objective

These paving projects are part of infrastructure upgrades funded through the Capital Reinvestment Program.

Financial Implications

Staff is recommending the following projects for the 2018 Paving Program:

Doherty Drive from Doherty/Ritson to end	\$81,000
Willis Street	\$94,700
Pierce Crescent (from Patchett to top of hill)	\$35,700
Shepherd Ave. 400 Block	\$89,300
Sargent Street	\$51,400
Lazzarin Street	\$24,800
Total	\$376,900

Background

These projects were selected with consideration given to road base condition, traffic use, and the underground utilities not needing replacement in the near future.

The projects on residential streets are recommended due to road base being in reasonable condition and a "cap" of asphalt now would save the complete rebuild of the road prior to complete base failure. Milling will occur on portions of the Sargent, Shepherd, and Willis

projects in order to match elevations with re-paving over existing asphalt in place. Some small sections of the road area require minor base prep prior to paving.

Concurrence

Director of Public Works Operations

Utilities Superintendent
